Dr. K. C. Atwood  
Marine Biological Laboratory  
Woods Hole, Massachusetts

Dear Kim,

I am sorry I didn't catch you before you left as I particularly hoped to spend some time with you on Saturday and talk things over, both apropos space and lots of other things. There has been a number of interesting angles that have come up during the Summer Study that I especially wanted your counsel about, and which might have been at least as interesting to you as some of the other things you were involved with. Also, many other matters! However, I hope there will be some further chance and, until then, as ever.

Sincerely yours,

Joshua Lederberg,  
Professor of Genetics
